## *We've Changed Our Name & Look*

**Important news!** You're about to get the same great technology expertise and excellent customer service that you're accustomed to from a global company with a new name!

Genesis Computer Solutions, a Southwest Florida leader in technology since 1994, is now changing its name and image —to **Genesis Global Technologies**—to better symbolize our expanding range of technology services worldwide.

This means you get the same technical expertise, the same responsive service, and the same dedicated talent—you've come to expect from Genesis Computer Solutions.

We'll continue to provide computer network engineering and support, Internet Commerce and software and database programming. But now we've added world class business productivity and business automation tools like **Genesis Advantage** ([www.GenesisAdvantage.com](http://www.GenesisAdvantage.com)).

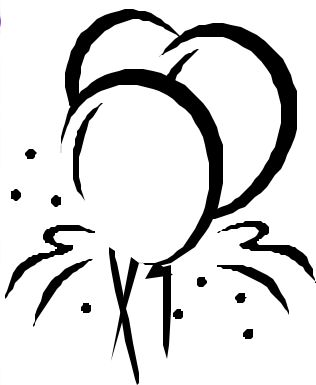

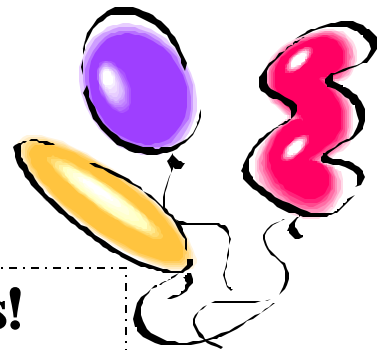

### **World Class Technology...Local Service**

**You'll notice our name and image change immediately on all of our materials.** It's still the same company, just bigger and better with a new global presence.

Remember: **Genesis Global Technologies.**
